Bernadine Michael

June 6

20+

Hi to all the Mommies in this group. It's so hard to write this as sadness and heartache is relieved over and over again. This is my story:-

9

20+

My daughter, Denise Alexandria Michael was born 22 June 1994 thru a C-section due to reason "baby in distress". At the age of 7, she was diagnosed with SLE (Systemic Lupus Erythematosus), an auto-immune disease in which the bacteria attacks the host body instead of protecting it. That started the journey of a thousand miles to GH for treatment, monthly n weekly stays for IV meds, sudden emergency sickness, visits to docs in various dept as the many types of medication involved, affects other parts of the body including the eyes, liver, heart, brain n other major organs.

So as the years passed by, she was in n out of GH , some were short stays while others were long.

In 2006, things took a bad turn. She became very sick n was hospitalised for more than 7 or 8 mths during which my hubby n I took turns to care for her. The docs then decided she had to do dialysis as both her kidneys had failed. So since around Aug/Sept 2006, we did the manual dialysis for her but after a short period, opted for the machine use and that came with a heavy cost to bear.

In 2013, I resigned from my job to care full time for her as she was getting weaker. She was even unable to hold a mug on her own for many years altho she could spoon feed herself. By then, her bones had become so brittle and she looked so frail.

20+

By 1st March 2014, she suddenly could not walk at all n had to be carried either by my hubby or son. By 1st Aug 2014, she had daily body aches that were sometimes so unbearable.

2015 - was a bad year for all of us. She was in n out of GH and on 20th July . she was admitted again for one last time. The docs told us that she was already in a critical condition n did everything they could to keep her comfortable. By then, her heart was already failing.

My hubby n I stayed with her throughout her last days. It was very difficult n heartbreaking knowing she was going away forever n as parents, feel so helpless. Watching her struggle until her last breathe....Sigh

On 5th Aug 2015, our Angel went back to Heaven to be with God. She had endured so much of pain all those 14 years since 2001 not to mention the 900 (nine hundred) plus tablets she had to take monthly and twelve injections a month.

The MONTHLY cost of dialysis started off with RM100, and every year doubled until it became RM2,400 which was even more that my salary.

So in order to pay my mountains of bank loans taken for the payment of dialysis, I have just started making Homemade Garlic Paste for use on breads and in soups and roast chicken or lamb.

The cost for each container of 340g is RM18 (not inclusive of postage). I would also appreciate some feedback reg the paste. Please whatsapp me at 016-403 5274.

The cost of postage is RM5-95 for 1 tub and for 2 tubs it is RM7-30 For 3 tubs it is RM9-95 while 4 tubs it is RM11-25

Anything more than 2 kgs will have another postage charge. Thank you all very very much. Pls remember to send a screenshot after payment.as there are some who had paid but forget to send. the payment slip Therefore they are unable to get the Garlic Paste as I don't have their address.Pls also include your name and contact no and the no of containers required.

May I suggest those who want faster delivery to pm me direct and send me the required payment slip plus their details. In that way , I can send out the tubs faster.Thks
