

HEALTHY GUT

Do your customer's dogs need support with:

- Nutrition absorption (especially in kibble fed animals)
- Loose or inconsistent stools
- Digestive issues
- Digestive disease

*If any of these symptoms are emergencies or life-threatening, please ask your customer to see their trusted veterinarian.

What Is Healthy Guy?

This product is a 14-strain allergen-free pre and probiotic blend with the added benefits of digestive enzymes. Healthy Gut aids in the digestion of food and supports a healthy immune system. Helps rebalance and cultivate proper growing conditions for friendly digestive flora destroyed by antibiotics and toxins.

Did You Know?

Large stool volume is often an indication that an animal would benefit greatly from this product, as they may not be absorbing their food properly.

Digestive enzymes allow the animal's body to not only digest more comfortably, but also to absorb more nutrients from their meals, resulting in cost-savings and less waste.

Most pet probiotics on the market today have been developed for humans, not animals. Fido's Flora contains two species of canine-derived probiotics that have been tested and proven to survive the acidic environment of a dog's digestive tract.

Pro Tip:

Healthy Gut is great for malnourished, kibble-fed, or chronically sick animals that require a dramatic boost in their nutrient absorption rate. It's also highly effective when used with senior and rescue animals.

Pro Tip:

Bad breath can actually be coming from the gut. Microbiome (gut) and oral health are critical to overall wellbeing. Healthy Gut is intended to do exactly what its name implies... build a healthy environment in your animal's gut - as well as the mouth!

Directions for Use:

Divide your animal's recommended daily dose and add evenly into each meal.

ANIMAL WEIGHT	DAILY SERVING
1 – 5 LBS	1/4 TSP
6 – 15 LBS	1/2 TSP
16 – 39 LBS	3/4 TSP
40 – 59 LBS	1 TSP
60 – 89 LBS	1.5 TSP
90+ LBS	2 TSP

Ingredients:

Larch Arabinogalactan - Is a prebiotic that feeds probiotics, helping to keep them healthy and viable, reducing incidents of chronic infection with the added benefits of having anti-cancer and immune-modulating properties.

Multi-Strain Probiotic Blend

1 billion allergen-free colony forming units of our cherry-picked multi-strain probiotic blend provides beneficial bacteria to establish healthy colonies and keep bad bacteria at bay.

Papain

Papain helps the body break down protein foods, like animal meat, and is commonly used to support the improvement of gastrointestinal dysfunction and digestive issues.

Bromelain

Bromelain is a protein-digesting enzyme mixture derived from the stem, fruit, and juice of the pineapple plant. When taken with food, it aids in the proper digestion and absorption of food as it breaks down protein.

Betaine

When taken as a digestive supplement, Betaine HCl promotes the production of additional Hydrochloric Acid in the stomach which may aid digestion and assist in the absorption of proteins, calcium, iron and B12.

Pancreatin

Provides protease, lipase, and amylase to assist in digestion and to improve the absorption of fat, protein, and energy. When taken away from food, it exerts anti-inflammatory and pain relieving actions.
